

The PCOR Partnership has the data you need!

Since its inception in 2003, the PCOR Partnership has been performing the research and development essential to understanding our region's potential with respect to carbon capture, utilization, and storage. We are also dedicated to providing this information to our partners through various resources.

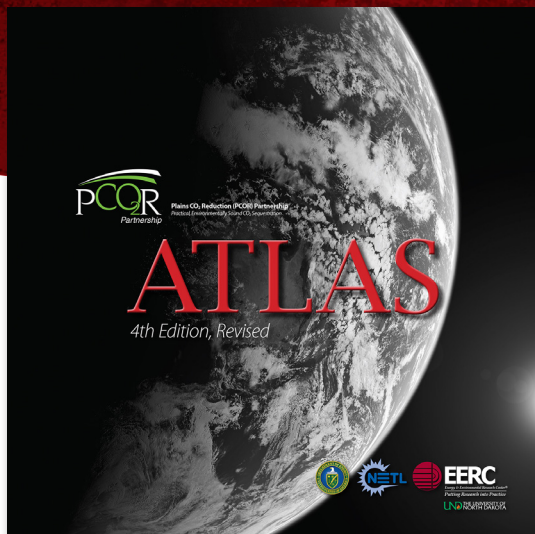

Plains CO₂ Reduction (PCOR) Partnership
Practical, Environmentally Sound CO₂ Sequestration

UND THE UNIVERSITY OF
NORTH DAKOTA

NEW!

The latest version of the PCOR Partnership regional atlas has successfully taken updated technical information about CO₂ storage opportunities and put it into perspective for the general public.

AWARD WINNING!

The PCOR Partnership and Prairie Public Broadcasting have developed an award-winning documentary series. These documentaries are aired on Prairie Public Television and made available to other public television stations nationally. The use of the broadcasts is optimized by offering DVDs of the television productions and streaming video.

For more information, visit the PCOR Partnership Web site at www.undeerc.org/PCOR.

Members receive access to the Partners-Only Decision Support System (DSS) for information on sources, sinks, transportation options, and regulatory and permitting requirements. The DSS has proven to be one of the most valuable research tools available to our partners as a model for regional assessments of CO₂ storage geologic potential. We recently added an improved geographic information system interface and many updated features to the DSS homepage, including advance access to technical reports.

The screenshot shows the DSS homepage with a navigation bar at the top containing links: DSS Home, PCOR Partnership, Partner Directory, EERC Contacts, and Site Map. The main heading reads "Your Gateway to CO₂ Management". Below this, a sub-header states: "The PCOR Partnership Decision Support System (DSS) contains tools to help partners make decisions about CO₂ management." On the left is a sidebar menu with categories like Carbon Management, Regulations, Carbon Markets, Risk Management, Field Validation Tests, Demonstration Projects, Interactive Maps, Products Database, Image Gallery, and Keep Me Informed. The main content area features a "Products Database" search interface with options to search by title, authors, conference, file type, and date. On the right, a map of the United States is displayed with numerous red dots indicating CO₂ storage sites, primarily concentrated in the central and eastern regions.

SAVE THE DATE

PCOR PARTNERSHIP ANNUAL MEETING

SEPTEMBER 25–26
2013

Register online at www.undeerc.org/PCOR13

Marquette Hotel, Minneapolis, MN

The PCOR Partnership is bringing together the stakeholders needed to make CO₂ utilization and storage a viable option for carbon management in our region.

We hope we can count on your support as we proceed further with investigating large-scale CO₂ storage demonstration projects!
